Education

Columbia University **New York, NY** **Expected Dec 2019**
M.S in Data Science, GPA: 3.9/4.0
Classes: Algorithms for Data Science, Machine Learning for Data Science, Database Systems, Statistical Inference

University of Virginia **Charlottesville, VA** **Aug 2015 – May 2017**
B.A. in Computer Science & Statistics (Econometrics Concentration), GPA: 3.8/4.0, Graduated in 2 years
Classes: Database Systems, Data Analysis w/ Python, Mobile App Development, Time Series Analysis
Awards: Dean's List (4 out of 4 semesters), UVA Order of the Orange Stole

Technical Skills & Training

Technical Skills

- Computer Programming Techniques: Data Science, Data Mining, Data Visualization, AI, Web Scraping, Natural Language Processing, Computer Vision, Recommender systems, Machine Learning, Neural Network, Time Series, VR/AR Development (Hololens)
- Languages & Programming Tools: AWS, Azure, Google Cloud (+Bigquery, Dataflow), Python (Scipy, Tensorflow, Keras), Java, R Studio, MySQL, Tableau, Apache, C++, C#, Unity

Additional Coursework

- Coursera: Machine Learning (Aug 2017), Neural Networks and Deep Learning (Sept 2018), Structuring Machine Learning Projects (Oct 2018), Convolutional Neural Networks (Jan 2019)

Professional Experience

Columbia CGUI Lab **Research Assistant** **Sep 2019 – Dec 2019**
Developing Unity (C#) based Augmented Reality projects with Professor Feiner.

Emadri **Data Scientist** **Jun 2019 – Dec 2019**
Designed recommendation systems for recommending packing list items for travelers.

- Utilized topic modeling, natural language processing, and computer vision to create a recommendation system.
- Created APIs and databases related to recommendation systems.

Bluehole Studio **Data Analyst** **Jun 2017 – Jul 2018**
Provided data-centered insight for business decisions *(Tools Used: Python, R Studio, C#)*

- Provided 20+ data analysis papers on TERA, Bluehole Studio's leading MMORPG Title.
- Upgraded the company's former Business Intelligence system using Tableau.

Project: Tera Reader Dec 2017

- Implemented web scraping and natural language processing skills to collect data from different video game community websites and to generate a clear picture of video game trends.

Research & Projects

Pally **Verizon** **Dec 2018**
Project on improving social skills for autistic children using Augmented Reality (w/ Hololens) and 5G Network.

- Focused on using computer vision and natural language processing AI, along with augmented reality development, to help autistic children understand the behavior of others.
- Awarded as a winning project for Verizon 5G EdTech Challenge .

Resc You **Columbia University** **Sep 2018**
Project on using Facial Recognition along with IBM Cloud to contact people with needs during emergency situations.

- Developed an application that identifies registered personnel from pictures taken from mobile devices, for easy guidance during emergency situations.
- Awarded 1st place on IBM Call for Code Columbia Hackathon
