RESEARCH INTERESTS

My main research goal is to solve 2D/3D generation problems with semantic control through deep learning. My prior research areas include 3D human digitalization, generative models, Deepfake detection, and VR/AR programming.

EDUCATION

Master of Science Data Science Columbia University (GPA : 3.9/4.0)	Aug 2018 – Dec 2019 New York, NY
Bachelor of Arts Computer Science, Statistics University of Virginia (GPA : 3.8/4.0) (2 year early graduation)	Aug 2015 – May 2017 Charlottesville, VA

WORK EXPERIENCE

Deep Learning Researcher Naver Webtoon AI <ul style="list-style-type: none">Researched and designed deep learning solutions focused on image / 3D generation and editing	Sep 2021 - Current Pangyo, ROK
Deep Learning Researcher Deepbrain AI <ul style="list-style-type: none">Researched and designed deep learning solutions for face generation and speech synthesis	Jan 2020 - Sep 2021 Seoul, ROK
Research Assistant Columbia University CGUI Lab <ul style="list-style-type: none">Developed Unity (C#) based Augmented Reality projects with Professor Steven K. Feiner.	Sep 2019 – Dec 2019 New York, NY
Data Scientist Emadri <ul style="list-style-type: none">Designed recommendation systems for recommending packing list items for travelers.	June 2019 – Dec 2019 New York, NY
Data Analyst Krafton <ul style="list-style-type: none">Provided 20+ data analysis papers on TERA, Krafton's leading MMORPG Title.	June 2017 – Jul 2018 Pangyo, ROK

PROJECTS AND RESEARCH

AI Studio : An easy-to-use generative AI framework Python, C# Naver Webtoon AI <ul style="list-style-type: none">Created an interactive, user-friendly system of creating images based on generative AI models.	June 2023
Augmented-Reality-Assisted Intraoral Scanning (ARIOS) C# Columbia University <ul style="list-style-type: none">Participated in a proof-of-concept study of implementing Augmented Reality towards intraoral scanning to further improve efficiency of scanning procedures.Research abstract was accepted as an oral communication for EAO-DGI Joint Meeting 2023.	June 2023
Chupa : Diffusion-based 3D Human Digitalization Python, C# Naver Webtoon AI & Seoul National University <ul style="list-style-type: none">Collaborated with SNU Visual Computing Lab in creating 3D clothed human models via diffusion probabilistic models.Research paper was accepted as an oral paper to ICCV 2023.	Feb 2023

LPMM : Facial landmark based Talking-head model Python	Aug 2022
Naver Webtoon AI	
<ul style="list-style-type: none"> Proposed a novel method of creating photorealistic talking head videos with enhanced pose controllability. Research paper was accepted to CVPR 2023 Workshop (AI4CC) 	
StyleGAN3-Inversion for cartoon images Python	Feb 2022
Naver Webtoon AI	
<ul style="list-style-type: none"> Introduced deep-learning based image reconstruction and editing methods towards translating photos into cartoon style illustrations, to aid artists and creators. Research paper was accepted to CVPR 2023. 	
KoDF: A Large-scale Korean DeepFake Detection Dataset Python	Oct 2020
Deepbrain AI	
<ul style="list-style-type: none"> Large scale original/synthesized (deepfake) facial video dataset focused on asian subjects, along with a deepfake detection model trained on the dataset. Research paper was accepted to ICCV 2021. 	
Augmented Reality for Dental Implant Applications C#	Nov 2019
Columbia University	
<ul style="list-style-type: none"> Augmented Reality program based on EPSON's Moverio smart glasses, aimed to aid dental students during implant practices. 	
Pally : Augmented Reality for Social Transition C#	June 2019
Verizon 5G Edtech Challenge	
<ul style="list-style-type: none"> Project on improving social skills for autistic children using Microsoft Hololens and 5G Network.

HONORS AND AWARDS

Verizon 5G Edtech Challenge Winning Project	May 2019
UVA Order of the Orange Stole	May 2017
Recognition for early graduation at University of Virginia	
Dean's List	August 2015 – May 2017
Recognition for academic excellence at University of Virginia	

SKILLS

Languages: Korean, English

Programming: Python (PyTorch, Tensorflow), MATLAB, C++, C#, Java, SQL, R Studio, AWS, Azure
